Livestock number in the Republic of Serbia, 1999- 2008

NOTES:

The presented data are preliminary results on the number of livestock and poultry and on the number of breeding heads, by types.

Data on the number of livestock and poultry, referring to agricultural enterprises and cooperatives are collected by regular annual reports.

Data on the number of livestock and poultry, related to private agricultural holdings and households are obtained by annual Livestock Number Survey (two - stage stratified sample), covering about 1 % of private households.

The data as of December 1st 2008 in the Republic of Serbia, when compared to the previous data, show that number of cattle decreased by 2.7 %, number of cows and heifers in calf by 3.7%, of pigs by 6.2%, of sows and sows of first farrow by 8.7 %, of sheep by 0.1%, while number of breeding ewes increased by 0.5%, of poultry by 4.7 % and number of goats by 3.4%.

Data related to the Republic of Serbia do not include data on Kosovo and Metohia.

Final data on livestock number, by types and categories, as well as data on livestock balance, increase and livestock production will be published in April of the current year.
